PROJECTS

Developed a Video Calling Platform with React.JS ,Node.JS, Express, And MONGODB

A video calling platform. OMEGLE like platform for random matching with video, text communication. (For communication minimum two users should be present for pairing)

This is an online video calling platform with text messages also available, in which users are matched with strangers randomly. This idea is inspired from OMEGL

For FRONTEND - React.JS , For Video Communication - WEBRTC, Simple Peer

For signaling-Socket.IO

For BACKEND - Node, Express
